

# AFRIN A

## SOFTWARE ENGINEER

Phone: 6238384858 | Email: afrinnazeer727@gmail.com | LinkedIn: linkedin.com/in/afrinnazeer  
GitHub: github.com/afrinnazeer12 | Location: Pallimokku, Tattamangalam, Chittur

---

### **PROFESSIONAL SUMMARY**

Motivated Software Developer and Software Tester with expertise in Java, C#, and Spring Boot, specializing in the development, testing, and optimization of scalable applications. Specialized in Behavior-Driven Development (BDD) frameworks such as SpecFlow with hands-on experience in building robust automation solutions and maintaining high-quality test coverage. Proven ability to design, implement, and validate innovative solutions using modern technologies. Adept at problem-solving, collaborating within teams.

---

### **TECHNICAL SKILLS**

**Programming Languages:** Java, C#

**Frameworks/Libraries:** Spring Boot

**Tools/Platforms:** Visual Studio, Eclipse, Jira, Postman, Git & GitHub, Excel, Spring Tool Suite, IntelliJ

**Cloud :** AWS

**Databases:** MySQL

**Front-End Technologies:** HTML, CSS

---

### **PROFESSIONAL EXPERIENCE**

#### **QUALITEST | SOFTWARE ENGINEER**

- Developed strong expertise in backend software development, delivering robust, scalable, and maintainable solutions using Spring Boot and Microservices architecture.
- Designed and implemented modular, distributed systems that promote loose coupling and high cohesion, enabling seamless service integration and independent scalability.
- Demonstrated end-to-end ownership across the software development lifecycle, including coding, configuration, deployment, and post-release maintenance.
- Contributed to a healthcare domain project, focusing on backend development for APIs that manage sensitive patient data and clinical workflows, ensuring compliance with data privacy standards.
- Engineered secure and efficient authentication mechanisms and handled complex JSON/XML payload validations to ensure data integrity and interoperability.
- Integrated and maintained CI/CD pipelines to automate build, test, and deployment processes, improving release velocity and reducing manual intervention. Familiar with tools like Jenkins, GitHub Actions, and AWS CodePipeline.
- Hands-on experience with a wide range of tools and technologies:
- Spring Boot – for building scalable backend services
- Postman – for API interaction and validation
- Git & GitHub – for version control and collaborative development
- Karate Framework – for behavior-driven API automation
- AWS – for cloud-based deployment, storage, and scalability
- CI/CD tools – for continuous integration and delivery automation

## CLOUTE TECHNOLOGIES PVT LTD | SOFTWARE DEVELOPER INTERN

- Experienced in Software development with a strong foundation in Java, Spring Boot, MySQL, HTML5, CSS, and RESTful APIs, contributing to the successful end-to-end delivery of enterprise-grade applications in the healthcare domain.
  - Designed, developed, and deployed the Client Master Module using Spring Boot, adhering to clean code principles, modular architecture, and performance driven design patterns, ensuring scalability and maintainability.
  - Optimized API integration workflows, achieving a 30% improvement in data interaction speed by streamlining request-response cycles and reducing payload overhead.
  - Engineered and maintained scalable SQL database schemas, ensuring data integrity, efficient indexing, and high-performance query execution across large datasets.
- 

## **PROJECTS**

### **ELEVATE TECH PORTFOLIO**

- Developed a personal portfolio website using HTML and CSS, showcasing professional skills, projects, and experience.
- Created an introduction section with a brief overview of personal details, professional title, and tagline.
- Designed an About section detailing educational background, technical skills, and work experience.

### **CLIENT MASTER**

- Developed and implemented a Client Master Module using Spring Boot, focusing on high code quality and performance optimization.
- Optimized API integration, achieving a 30% improvement in data interaction speed between services by refining data flow and implementing performance-enhancing techniques.
- Managed SQL database integration, ensuring efficient data storage, retrieval, and management, while optimizing performance and scalability.

### **SIT (HEALTH CARE)**

- Developed and maintained RESTful APIs using Spring Boot, enabling secure and efficient communication between services and client applications.
  - Designed and implemented services as independent microservices, allowing modular development and deployment. This improved fault isolation, scalability, and maintainability of the system.
  - Used Git & GitHub for source control and team collaboration, managing feature branches, pull requests, and code reviews effectively.
  - Ensured APIs were scalable, secure, and aligned with healthcare interoperability standards.
- 

## **EDUCATION**

- **Master of Computer Applications (MCA)**  
Dr. G.R. Damodaran College of Science August 2022 – March 2024
- **Bachelor of Computer Applications (BCA)**  
Yuvakshetra Institute of Management Studies, Mundur July 2019 – March 2022
- **Higher Secondary (Computer Science)**  
Vijayamatha Convent HSS, Chittur June 2017 – March 2019
- **Secondary School Leaving Certificate (SSLC)**  
Chinmaya Vidyalaya, Tattamangalam June 2016 – March 2017
