PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ years of experience building scalable Full Stack and backend systems using Java, Spring Boot, and modern web technologies. Strong foundation in data structures, algorithms, and system design, with hands-on experience in developing RESTful services and integrating frontend components. Proven ability to optimize performance, debug production issues, and contribute across the Software Development Lifecycle (SDLC). Experienced in Agile environments, collaborating on code reviews, and delivering reliable, user-focused solutions. Passionate about building secure, high-performance applications at scale.

TECHNICAL SKILLS

- Programming Languages: Java , C#
 - Frameworks: Spring Boot
 - Architecture: Microservices
 - Cloud: AWS
 - Frontend: HTML, CSS
 - Databases: MySQL
 - Tools: Git, GitHub, Postman, Jira, IntelliJ, Eclipse
 - Monitoring & Logging: Kibana,Grafana
 - Other: REST APIs, CI/CD, JSON, XML, Agile, SDLC, STLC
-

PROFESSIONAL EXPERIENCE

QUALITEST | Software Engineer (Client: Philips) March 2025 - Present

- Developed and maintained RESTful APIs using Java and Spring Boot for healthcare application services.
- Designed and implemented microservices-based backend applications, ensuring scalability, maintainability, and independent deployment.
- Optimized application performance by improving database queries, API response times, and backend processing efficiency.
- Collaborated with Agile development teams to deliver new features and enhancements aligned with sprint goals and release timelines.
- Implemented secure authentication and authorization mechanisms using industry-standard security practices to protect sensitive healthcare data.
- Worked with AWS services to deploy, monitor, and scale backend applications in cloud environments.
- Integrated CI/CD pipelines for automated build, testing, and deployment processes, improving development efficiency and release quality.
- Utilized Kibana and centralized logging tools to monitor application health, troubleshoot issues, and analyze system performance.

CLOUTE TECHNOLOGIES PVT LTD | ASSOCIATE SOFTWARE ENGINEER INTERN Jan 2024 - April 2024

- Developed backend services using Java and Spring Boot, contributing to scalable enterprise application development
- Designed and implemented the Client Master Module, managing core business workflows and data processing
- Built and consumed RESTful APIs to enable seamless integration between distributed systems
- Applied object-oriented design principles (OOA/OOD) in designing reusable and maintainable components
- Optimized MySQL queries to enhance data retrieval performance and system efficiency

PROJECTS

Health Care Management System | Philips

- Developed and enhanced scalable backend services using Java, Spring Boot, and Microservices Architecture to support healthcare workflows and patient data management.
- Designed and implemented RESTful APIs for seamless integration between multiple healthcare systems and third-party applications.
- Collaborated with cross-functional Agile teams to design, develop, test, and deliver backend features within sprint timelines.
- Performed production issue analysis, debugging, and performance tuning to improve system stability, scalability, and user experience.

E-Commerce Order Management System

- Designed and developed a backend Order Management System using Java and Spring Boot
- Built RESTful APIs for managing orders, users, and product workflows
- Implemented Microservices architecture to separate services like Order, User, and Inventory
- Integrated MySQL database for efficient data storage and retrieval
- Implemented JWT-based authentication and authorization for secure user access
- Optimized database queries and API performance, improving response time and system efficiency

API Test Automation using Karate Framework

- Developed automated test scripts using Karate Framework with Java for validating web application APIs
- Designed and executed BDD-style test scenarios for API testing, improving test coverage and reliability
- Validated REST API responses, including status codes, headers, and payload data
- Performed data-driven testing using JSON files to handle multiple test scenarios
- Automated regression test suites, reducing manual testing effort and improving efficiency

Responsive Cake Shop Web Application

- Developed a responsive cake shop website using HTML, CSS, JavaScript, and React.js
- Built reusable React components for product listing, navigation, and UI elements
- Designed an interactive and user-friendly UI/UX, improving customer engagement
- Implemented dynamic features using JavaScript, such as form handling and client-side validation
- Created pages for product display, menu listing, and customer order/contact forms
- Used React state management to handle UI updates and user interactions efficiently

EDUCATION

Master of Computer Applications (MCA)

Dr. G.R. Damodaran College of Science (2022 – 2024)

Bachelor of Computer Applications (BCA)

Yuvakshetra Institute of Management Studies (2019 – 2022)

CERTIFICATIONS

Java Full Stack Web Development Certification

- Completed comprehensive training in Java, Spring Boot, HTML, CSS, JavaScript, React.js, and MySQL
- Developed hands-on experience in building full-stack web applications and designing RESTful APIs
- Gained practical knowledge of frontend and backend integration, application architecture, and best coding practices
